

FONT INSTALLATION INSTRUCTIONS

THIRD PARTY FONT MANAGEMENT SOFTWARE

If you're using ATM Deluxe, Suitcase, Master Juggler, Font Reserve, or another other third party utility, please follow the font instillation instructions that came with your software.

MACINTOSH OSX INSTRUCTIONS

If you purchased and downloaded the fonts on our web site, unzip the archive if your browser has not already done so. Simply copy the fonts to the **Fonts** folder inside your **Library** folder. If you want the fonts accessible to all users of your machine, place them in the **Fonts** folder of the top level **Library** folder. We recommend installing fonts in this manner, rather than using FontBook to install them.

WINDOWS 7 INSTRUCTIONS

You can install fonts two ways. The first is to right click on the font file(s) and select **Install** from the fly-out menu. The second way is to select **Control Panel** from the **Start** menu. Then select **Appearance and Personalization** and click **Fonts**. Drag the font files into this window and they'll be installed. If there is an error, be sure that the font file isn't compressed (it should not have a zipper icon) and/or be sure that you have Administrator privileges (you can find this out in the **User Accounts** section of the **Control Panel**).

WINDOWS VISTA INSTRUCTIONS

If you purchased and downloaded the fonts on our web site, unzip the archive if your browser has not already done so. Select **Control Panel** from the Start menu; select **Appearance and Personalization**; select **Fonts**. In the Fonts window, right click in the list of fonts and choose **Install New Font**. Navigate to the folder that contains the fonts you want to install. Select the font(s) you want to install. Shift-click to select multiple fonts. Press the **OK** button to install the fonts.

WINDOWS XP INSTRUCTIONS

If you purchased and downloaded the fonts on our web site, unzip the archive if your browser has not already done so. Double click on the **Main** icon, then double click on the **Control Panel** icon. Find the **Fonts** icon and double click on it. In the **Fonts** window, go to the **File** menu and select **Install New Font**. In the **Drive** window, find the disk and directory that holds your fonts. Your fonts will appear in the **List of Fonts** menu. Click on the font names you wish to install, then click on **OK**.

OPENTYPE COMMENTS

House Industries collections ship as OpenType fonts. The OpenType font files are cross-platform compatible—you can use them on a Mac or PC.

ADOBE TYPE MANAGER WITH MACINTOSH OS 9, WINDOWS 95 AND 98

For your fonts to work correctly in OS 9.22 and lower or Windows 98 and lower, you must be using Adobe Type Manager.
